## PRODUCT INTRODUCTION

Our water softener salt is made from refined food grade salt. These strong smooth tablets are compacted using the latest European technology, so they will not fall apart. With nothing added and nothing taken away; these are one of the purest water softening salt and will ensure best results for your water softener. Sambhar salt for water softening were specially developed for applications in water softening units such as, in households, hotels and restaurants, hospitals, cleaning facilities, laundries, food and beverage and other water softening equipment. Our water softener Salt N-1 is produced in the main producing areas of softner salt, Sambhar province. The raw material from Lake more than 100 meters underground, formed in hundreds of millions of years ago, pure natural. After drilling to the depth of the rock salt layer and pouring into water through pipe, the rock salt is dissolved into brine, and the brine feed into the plant. After evaporating, drying and other processes, the brine is crystalized and refined into salt. Then the refined salt is compacted into salt tab. The purity is up to 99.6% sodium chloride and the water insoluble matter is below 0.05%. Our water softner salt N-2 also is produced in Sambhar province. It is made through evaporating lake water and other processes. The purity is up to 99.2% sodium chloride and the water insoluble matter is below 0.1%.

## THE THREE MAJOR CHARACTERISTICS

1

Our salts are made of natural pollution-free deep-well rock salt is mined from more than 100 meters underground, formed hundreds of millions of years ago as raw material. After the secondary crystallization then refined into colour pure white, particle full and smooth water softener salt without anti-caking agent and other chemicals. The content of NaCl above 99.6%, high purity and strong effect and completely accord with the standard of food grade, also can insure salt box clean and no impurities.

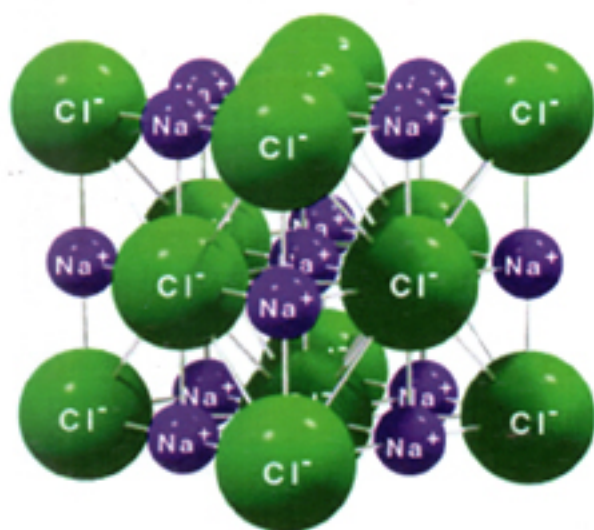

2

Our salts can keep same shape for every batch, particles full and suitable size, do not damage the machinery and equipment. The dissolution is uniform can save salt consumption with high effect to restore the resin. Keep consistent thickness in appearance, do not bridge, not into the lump can ensure the quality and efficiency of soft water.

3

Our salts are taking full advantages of latest European technology, so they will not fall apart. With nothing added and nothing taken away. After a special formula preparation, the function is superior to any other soft water salts. It can reach double removal effect of impurities in the water, the capacity is 6 times higher than other salts.

salt

### Specification

- NaCl (sodium chloride) : 99.6%
- Water insoluble matter : 0.05%
- Water : 0.05%
- Diameter : 0.4 mm
- Thickness : 0.5 mm
- Colour : White
- Iodine : Nil
- Packaging :  
50 kg/high quality woven bag  
or as your requirement.
